To whom it may concern,

It is with great pleasure that I recommend Lucianne Ribeiro. From the moment I walked into Children's Connection over four years ago, I could feel the warmth and love that is ever present at this center. Children's Connection is truly unique in its ability to combine a loving environment with that of a school where children two years and older can learn everything from how to share with their friends, hold a paintbrush and learn to imaginatively create, and sing and dance to the music of a pianist who visited the center weekly. Children learn through creative and imaginative play, and interacting with one and other. Both my daughters, extremely different in personalities, thrived under the nurturing and guidance of Lucianne. She fosters this wonderful feeling of community among children and their families, and an amazing sense of security.

In addition to the unparalleled care that Lucianne gives at Children's Connection, she also provides a nutritious hot lunch and two snacks. Our children benefited greatly from exposure to a variety of healthy foods including Greek, Brazilian, and American cuisine! Finally, the center is always impeccably clean. This is not to say that it is neat while children are at play, but at the start of each day it is organized and spotless.

I could not even count the number of families I have personally referred to Children's Connection. It is truly a wonderful place for children and families alike.

Please feel free to contact me with any further questions or concerns.

Sincerely,

Traci Doherty
